## **Current Management in Child Neurology, 4th edition** Bernard L. Maria

Current Management in Child Neurology, Fourth Edition aims to provide busy practitioners with standard-of-care reviews on the evaluation and treatment of the most common complaints or conditions that relate to nervous system disorders and dysfunction. The book is designed to supplement standard textbooks that provide detailed information on etiology, pathogenesis, and therapeutic controversies in pediatric clinical neuroscience. This edition contains three sections and 111 chapters written by highly respected leaders in the field. It builds upon the success of previous editions by offering succinct updated reviews of the third edition chapters and several additional reviews by new authors on new topics. In the first section, Clinical Practice Trends, the reader will find data on the most common outpatient and inpatient conditions, insights into educational trends, pearls on conducting a meaningful neurologic examination, information on key Web sites, and advice on excelling at the art of medicine. In The Office Visit section, subheadings are organized according to the frequency of conditions in the office or clinic setting. The section offers management reviews in headache, seizures, epilepsy, neurobehavioral disorders, school readiness, developmental delay, and a range of other conditions. The final section, The Hospitalized Child, features chapters addressing current therapy issues for trauma, meningitis and encephalitis, injury to the preterm and term brains, status epilepticus, and a host of other conditions associated with hospital care. Several chapters were added to this new edition, including selections on current pharmacotherapy for migraine, epilepsy, and ADHD, each with practitioner-friendly tables on drugs; one chapter was added on home management of breakthrough seizures. A digital version of the book is now available. Customers who have purchased the book should go to our website (pmp-h-usa.com) to contact us and request a passcode to login to the e-book.
