This new title provides an overview of the current literature in interventional cardiology, identifying the papers published in the past eighteen months that have potentially changed practice, or that predict probable future developments. The aim is to provide the reader with an up to the minute summary of recent research findings, and their implications for clinical management.

Keeping up to date with the vast amount of published papers in interventional cardiology is a difficult task for the individual doctor. The Year in Interventional Cardiology 2002 provides a highly focused review of the current literature, compiled by an expert team from one of the leading centres in the field. This is a practical and accessible resource that all doctors will find invaluable in their daily practice.
