Programming Web Services with Perl Randy J. Ray, Pavel Kulchenko

Given Perl's natural fit for web applications development, it's no surprise that Perl is also a natural choice for web services development. It's the most popular web programming language, with strong implementations of both SOAP and XML-RPC, the leading ways to distribute applications using web services. But books on web services focus on writing these applications in Java or Visual Basic, leaving Perl programmers with few resources to get them started. *Programming Web Services with Perl* changes that, bringing Perl users all the information they need to create web services using their favorite language. *Programming Web Services with Perl* steers clear of the hype surrounding web services and concentrates on what is useful and practical. The book introduces the major web services standards, such as XML-RPC, SOAP, WSDL, and UDDI, and shows how to implement Perl servers and clients using these standards. You'll find detailed references on both the XML and SOAP toolkits, and learn when to use one technology in favor of the other. The book is rich with programming examples that you'll find useful well past the learning stage. And, moving beyond the basics, the book offers solutions to problems of security, authentication, and scalability. Some of the topics covered in the book are:

- HTTP and XML basics
- XML-RPC and the toolkits
- SOAP and toolkits
- SOAP::Lite
- Using SOAP with SMTP and other protocols
- Advertising and discovering with UDDI and WSDL
- The REST methodology
- The future of web services

Programming Web Services with Perl was written for Perl programmers who have no prior knowledge of web services. You can pick up this book without any understanding of XML-RPC or SOAP and be able to apply these technologies easily, through the use of publicly available Perl modules detailed in the book. If you're interested in applying XML-RPC and SOAP technologies to distributed programming applications, then *Programming Web Services with Perl* is a book you'll want to have.

From reader reviews:

Earnest Jennings:

Book is actually written, printed, or illustrated for everything. You can understand everything you want by a guide. Book has a different type. To be sure that book is important thing to bring us around the world. Close to that you can your reading skill was fluently. A guide Programming Web Services with Perl will make you to become smarter. You can feel considerably more confidence if you can know about almost everything. But some of you think that open or reading any book make you bored. It's not make you fun. Why they can be thought like that? Have you in search of best book or ideal book with you?

Jody Tolar:

Reading a book can be one of a lot of activity that everyone in the world really likes. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a reserve will give you a lot of new details. When you read a guide you will get new information due to the fact book is one of numerous ways to share the information as well as their idea. Second, reading a book will make you actually more imaginative. When you studying a book especially fictional book the author will bring you to imagine the story how the people do it anything. Third, you could share your knowledge to other individuals. When you read this Programming Web Services with Perl, you are able to tells your family, friends along with soon about yours book. Your knowledge can inspire average, make them reading a book.

Clarence Bowen:

Reading can called thoughts hangout, why? Because while you are reading a book specially book entitled Programming Web Services with Perl your brain will drift away trough every dimension, wandering in each aspect that maybe unknown for but surely might be your mind friends. Imaging just about every word written in a publication then become one contact form conclusion and explanation that will maybe you never get prior to. The Programming Web Services with Perl giving you another experience more than blown away your thoughts but also giving you useful data for your better life on this era. So now let us teach you the relaxing pattern here is your body and mind are going to be pleased when you are finished reading through it, like winning a casino game. Do you want to try this extraordinary spending spare time activity?

Marge Lee:

Do you like reading a publication? Confuse to looking for your chosen book? Or your book had been rare? Why so many problem for the book? But virtually any people feel that they enjoy to get reading. Some people likes examining, not only science book but novel and Programming Web Services with Perl or maybe others sources were given understanding for you. After you know how the truly great a book, you feel need to read more and more. Science book was created for teacher or maybe students especially. Those textbooks are helping them to add their knowledge. In additional case, beside science e-book, any other book likes Programming Web Services with Perl to make your spare time more colorful. Many types of book like here.
