Safety-Critical Systems: The Convergence of High Tech and Human Factors: Proceedings of the Fourth Safety-critical Systems Symposium Leeds, UK 6-8 February 1996

Safety-critical systems, in the sense of software-based systems used in safety critical applications, are 'high-tech'. They are products of modern technology. Their effective, efficient and safe functioning depends not only on the development of the right technologies but also on the right use of them. The safety of a system may be compromised not only by faults in the system but also by the use in the first place of an unreliable, unsafe, or unproved technology in its development. The key to the development and use of both technologies and systems is the human being. Until recently, the importance of human involvement, other than at the direct operational level, was hardly admitted. But now the unreliability of humans is recognised, as is the potential for latent faults to be introduced into systems at any point in their life cycles, by all who are involved with them, including designers and strategic decision makers.

From reader reviews:

Earl Hess:

The book Safety-Critical Systems: The Convergence of High Tech and Human Factors: Proceedings of the Fourth Safety-critical Systems Symposium Leeds, UK 6-8 February 1996 has a lot of knowledge on it. So when you read this book you can get a lot of help. The book was written by the very famous author. Mcdougal makes some research before write this book. That book very easy to read you can find the point easily after reading this article book.

Ena Clark:

Playing with family within a park, coming to see the sea world or hanging out with friends is thing that usually you will have done when you have spare time, subsequently why you don't try factor that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Safety-Critical Systems: The Convergence of High Tech and Human Factors: Proceedings of the Fourth Safety-critical Systems Symposium Leeds, UK 6-8 February 1996, you could enjoy both. It is very good combination right, you still wish to miss it? What kind of hang-out type is it? Oh seriously its mind hangout people. What? Still don't have it, oh come on its known as reading friends.

Delbert Storey:

Are you kind of hectic person, only have 10 or maybe 15 minute in your moment to upgrading your mind ability or thinking skill actually analytical thinking? Then you are experiencing problem with the book than can satisfy your short period of time to read it because this time you only find book that need more time to be read. Safety-Critical Systems: The Convergence of High Tech and Human Factors: Proceedings of the Fourth Safety-critical Systems Symposium Leeds, UK 6-8 February 1996 can be your answer because it can be read by an individual who have those short free time problems.

Anthony Koch:

The book untitled Safety-Critical Systems: The Convergence of High Tech and Human Factors: Proceedings of the Fourth Safety-critical Systems Symposium Leeds, UK 6-8 February 1996 contain a lot of information on the item. The writer explains her idea with easy way. The language is very easy to understand all the people, so do not necessarily worry, you can easy to read the item. The book was published by famous author. The author gives you in the new period of time of literary works. You can easily read this book because you can please read on your smart phone, or product, so you can read the book in anywhere and anytime. If you want to buy the e-book, you can available their official web-site and also order it. Have a nice study.
