Are you worried about how your older child will react once the new baby is born? Or, now that the baby has already arrived, is your older child already showing signs of hostility against you and his younger sibling?

While sibling rivalry is something that is considered natural as a child grows and develops through the years, it is possible to learn how to reduce these feelings and prevent your home from feeling like a war zone. The first sign that warns you that your older child resents the birth of his little brother or sister is that his behavior takes a turn for the worse. And then when he doesn't get your attention, he soon starts to take it out on the baby. He may even hit the baby, push her or bite her.

This book contains all the valuable lessons I wish I had received before my second child was born. While you may not be able to stop the jealousy and conflicts all together, this guidebook has the tips that you need to learn how to ensure that your older child will still feel loved and like he has not been replaced by a newer and better version of himself. In future, this will also help make your children get along well so that your home is a place of love and peace.
