**A (Patented) Heart Disease Cure That Works!** David H. Leake

Have you lost a loved one to heart disease since 1994? What if that could have been prevented?

Do you or someone you love have coronary artery disease right now? You do NOT have to “live with it.”

That is what I did for 17 years. I lived with it. Not anymore.

My options ran out when I eventually developed negative reactions to every available statin drug. Lipitor was the last and worst. That's when my heart doctor looked me in the eye and spoke those words no one wants to hear, "There's nothing more I can do for you." Desperate, I turned to the Internet. My prayers were answered when I found U.S. patent #5278189. Look it up.

Six months before his death from cancer, a 93-year-old genius gave mankind an incredible gift -- a simple, low-cost way to reverse, even cure, heart disease. To keep it in the public domain, he and an associate registered that patent so pharmaceutical companies could not control it. What they did, instead, was to make him out to be an old fool.

In autumn, 2007, I decided I had nothing to lose, so I opted to try his “cure.” Then the supposedly impossible happened. What was thought to be a heart attack in the summer of 2011 turned out to be Florida heat stroke. Then, after an invasive angiogram procedure conducted July 27, 2011, an expert cardiologist reported my heart to be "free of obstructive disease." You can see documentation of my battle with heart disease, ending with that cardiologist's findings, in excerpts of my personal medical record at <http://aworldwithoutheartdisease.com/>.

As you read this book you will learn:

- Coronary Artery Disease can be reversed, cured and prevented
- Cholesterol level is unrelated to heart disease
- Statin drugs do not reduce death rates due to heart disease
- Side effects of statin drugs are far more common than is being reported, and include permanent muscle damage, brain damage, loss of memory, and more

Imagine the lives that can be extended, the suffering that can be prevented, when more people learn there already exists a safe, inexpensive, NON-PRESCRIPTION cure for coronary artery disease. This book is for them, and YOU.
