Out of print for over 7 years, Integrated Pest Management for Potatoes in the Western United States has been completely revised and is available once again. The second edition contains extensively revised chapters on aphid management and virus transmission, leafhoppers and phytoplasma transmission, late blight, bacterial early dying, necrotic strains of PVY, black dot, silver scurf, and cover crops for nematode management. Inside you'll also find 51 new color photos, 58 tables and line drawings, a section on organic potato production, and a comprehensive index. Forty university researchers and Cooperative Extension specialists from across the west contributed to making this revision an up-to-date and essential reference for potato growers and pest management professionals.
