Distributed Application Programming in C++ (with CD-ROM)

Randall A. Maddox

Distributed Application Programming in C++ (with CD-ROM) Randall A. Maddox

As software becomes increasingly distributed, high-quality infrastructure becomes ever more important. Precisely written, replete with advanced code examples, and based on Randall Maddox' extensive experience teaching advanced C++, this book gives working C++ developers the insights and sophisticated techniques they need to build superior software infrastructure. Maddox begins by introducing the context required to support a distributed Web application in a Unix environment. He then presents the utility classes that illustrate crucial design and implementation issues and serve as building blocks for a distributed software architecture. Coverage includes concrete data types, templates, containers, namespaces, error handling, and an automated solution for the hazards of dynamic memory allocation. Maddox reviews C++ program startup and memory usage in detail, laying the groundwork for a full of understanding of multiprocessing, multithreading, and interprocess communication. Unlike most advanced C++ books, Distributed Application Programming in C++ goes beyond coding, introducing superior strategies for enterprise software development. Maddox presents key design/implementation tradeoffs, managing source code organization, build-time issues, the run-time environment, and more. For all professional developers who want to master the use of advanced C++ features in real-world distributed applications.

From reader reviews:

David Dugas:

This Distributed Application Programming in C++ (with CD-ROM) usually are reliable for you who want to be described as a successful person, why. The explanation of this Distributed Application Programming in C++ (with CD-ROM) can be one of several great books you must have is usually giving you more than just simple studying food but feed you actually with information that perhaps will shock your before knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions in e-book and printed versions. Beside that this Distributed Application Programming in C++ (with CD-ROM) giving you an enormous of experience for instance rich vocabulary, giving you tryout of critical thinking that we understand it useful in your day activity. So , let's have it and luxuriate in reading.

Derek Winter:

The reserve untitled Distributed Application Programming in C++ (with CD-ROM) is the publication that recommended to you to learn. You can see the quality of the e-book content that will be shown to a person. The language that author use to explained their way of doing something is easily to understand. The copy writer was did a lot of exploration when write the book, so the information that they share for your requirements is absolutely accurate. You also could get the e-book of Distributed Application Programming in C++ (with CD-ROM) from the publisher to make you much more enjoy free time.

Glenn Pryor:

The actual book Distributed Application Programming in C++ (with CD-ROM) has a lot of knowledge on it. So when you read this book you can get a lot of profit. The book was published by the very famous author. The writer makes some research just before write this book. This kind of book very easy to read you can find the point easily after reading this book.

Santiago Johnson:

Your reading sixth sense will not betray anyone, why because this Distributed Application Programming in C++ (with CD-ROM) publication written by well-known writer whose to say well how to make book that can be understand by anyone who else read the book. Written with good manner for you, leaking every ideas and writing skill only for eliminate your own hunger then you still hesitation Distributed Application Programming in C++ (with CD-ROM) as good book not simply by the cover but also from the content. This is one publication that can break don't determine book by its deal with, so do you still needing yet another sixth sense to pick this!?! Oh come on your looking at sixth sense already alerted you so why you have to listening to an additional sixth sense.
