Zeev Schuss

Brownian Dynamics at Boundaries and Interfaces: In Physics, Chemistry, and Biology (Applied Mathematical Sciences) Zeev Schuss

Brownian dynamics serve as mathematical models for the diffusive motion of microscopic particles of various shapes in gaseous, liquid, or solid environments. The renewed interest in Brownian dynamics is due primarily to their key role in molecular and cellular biophysics: diffusion of ions and molecules is the driver of all life. Brownian dynamics simulations are the numerical realizations of stochastic differential equations that model the functions of biological micro devices such as protein ionic channels of biological membranes, cardiac myocytes, neuronal synapses, and many more. Stochastic differential equations are ubiquitous models in computational physics, chemistry, biophysics, computer science, communications theory, mathematical finance theory, and many other disciplines. Brownian dynamics simulations of the random motion of particles, be it molecules or stock prices, give rise to mathematical problems that neither the kinetic theory of Maxwell and Boltzmann, nor Einstein's and Langevin's theories of Brownian motion could predict.

This book takes the readers on a journey that starts with the rigorous definition of mathematical Brownian motion, and ends with the explicit solution of a series of complex problems that have immediate applications. It is aimed at applied mathematicians, physicists, theoretical chemists, and physiologists who are interested in modeling, analysis, and simulation of micro devices of microbiology. The book contains exercises and worked out examples throughout.

From reader reviews:

John Dearman:

Information is provisions for folks to get better life, information these days can get by anyone in everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider while those information which is within the former life are difficult to be find than now is taking seriously which one is acceptable to believe or which one typically the resource are convinced. If you obtain the unstable resource then you understand it as your main information there will be huge disadvantage for you. All those possibilities will not happen with you if you take Brownian Dynamics at Boundaries and Interfaces: In Physics, Chemistry, and Biology (Applied Mathematical Sciences) as your daily resource information.

Becky Pope:

This book untitled Brownian Dynamics at Boundaries and Interfaces: In Physics, Chemistry, and Biology (Applied Mathematical Sciences) to be one of several books which best seller in this year, here is because when you read this e-book you can get a lot of benefit into it. You will easily to buy that book in the book store or you can order it by way of online. The publisher in this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Touch screen phone. So there is no reason to your account to past this book from your list.

Ruth Coleman:

Reading a e-book can be one of a lot of exercise that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a book will give you a lot of new data. When you read a guide you will get new information due to the fact book is one of numerous ways to share the information as well as their idea. Second, reading a book will make you more imaginative. When you reading through a book especially fictional works book the author will bring someone to imagine the story how the character types do it anything. Third, you are able to share your knowledge to other individuals. When you read this Brownian Dynamics at Boundaries and Interfaces: In Physics, Chemistry, and Biology (Applied Mathematical Sciences), you are able to tells your family, friends as well as soon about yours guide. Your knowledge can inspire others, make them reading a book.

Christopher Dixon:

A lot of people always spent their own free time to vacation as well as go to the outside with them household or their friend. Were you aware? Many a lot of people spent many people free time just watching TV, or maybe playing video games all day long. In order to try to find a new activity this is look different you can read a new book. It is really fun in your case. If you enjoy the book that you just read you can spent all day long to reading a e-book. The book Brownian Dynamics at Boundaries and Interfaces: In Physics, Chemistry, and Biology (Applied Mathematical Sciences) it is quite good to read. There are a lot of people who recommended this book. We were holding enjoying reading this book. In case you did not have enough

space to bring this book you can buy typically the e-book. You can m0ore quickly to read this book from the smart phone. The price is not too expensive but this book provides high quality.
