Not illustrated. 1899 Excerpt: ...dikes extending southward from Kmmitsburg to the Potomac. About Emmitsburg this rock has a coarse granular structure and is known commercially as Gettysburg granite. This coarse-grained variety is not of so great value for a roadmetal as the compact fine-grained rock found elsewhere in this dike. This stone can be conveniently shipped by rail. The limestone is confined to a limited area about Frederick and is generally rather soft. The harder varieties are found to have a considerable percentage of silicious material and made a better road-metal than those with less silica. The western portion of the county is furnished with sandstone and quartzitic rocks which present a very great variability of structure. The shales in the eastern portion are not of especial value as a road-metal. The map on Plate XXIII shows the location of the different rocks in the county. The following table shows the amount expended for roads and bridges during the past ten yensr. These figures were obtained from the office of the County Commissioners: FREDERICK COUNTY. ' Estimated. Previous to isnn there was little or nothing spent for stone roads as far as the books show, and since then only a rough estimate can be made. 'Includes \$9000 for snow drifts. Walkersville and Unionville receive \$25.00 each; and all the roads (except turnpikes of incorporated companies), in towns, except in Frederick City, Thurmont and Emmitsburg, are allowed the regular appropriation of \$12.00 per mile. In addition to the amount shown in the above table it is estimated that \$.i95,000.00 have been paid in tolls during the past ten years, making the total cost to the people of the maintenance of the public roads and turnpikes approximately \$003,800.00, exclusive of private contributions. GARRETT COUNTY. T...
