Edgar N. Sanchez, Alma Y. Alanís, Alexander G. Loukianov

Discrete-Time High Order Neural Control: Trained with Kalman Filtering (Studies in Computational Intelligence) Edgar N. Sanchez, Alma Y. Alanís, Alexander G. Loukianov

Neural networks have become a well-established methodology as exemplified by their applications to identification and control of general nonlinear and complex systems; the use of high order neural networks for modeling and learning has recently increased.

Using neural networks, control algorithms can be developed to be robust to uncertainties and modeling errors. The most used NN structures are Feedforward networks and Recurrent networks. The latter type offers a better suited tool to model and control of nonlinear systems. There exist different training algorithms for neural networks, which, however, normally encounter some technical problems such as local minima, slow learning, and high sensitivity to initial conditions, among others. As a viable alternative, new training algorithms, for example, those based on Kalman filtering, have been proposed. There already exists publications about trajectory tracking using neural networks; however, most of those works were developed for continuous-time systems. On the other hand, while extensive literature is available for linear discrete-time control system, nonlinear discrete-time control design techniques have not been discussed to the same degree. Besides, discrete-time neural networks are better suited for real-time implementations.

From reader reviews:

Roger Johnson:

The ability that you get from Discrete-Time High Order Neural Control: Trained with Kalman Filtering (Studies in Computational Intelligence) could be the more deep you digging the information that hide inside words the more you get interested in reading it. It does not mean that this book is hard to know but Discrete-Time High Order Neural Control: Trained with Kalman Filtering (Studies in Computational Intelligence) giving you joy feeling of reading. The article author conveys their point in selected way that can be understood simply by anyone who read that because the author of this e-book is well-known enough. This book also makes your own vocabulary increase well. So it is easy to understand then can go together with you, both in printed or e-book style are available. We advise you for having this kind of Discrete-Time High Order Neural Control: Trained with Kalman Filtering (Studies in Computational Intelligence) instantly.

Greta Rivera:

Spent a free time to be fun activity to accomplish! A lot of people spent their free time with their family, or all their friends. Usually they doing activity like watching television, planning to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Will you something different to fill your own free time/ holiday? Could be reading a book can be option to fill your free time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to try look for book, may be the book untitled Discrete-Time High Order Neural Control: Trained with Kalman Filtering (Studies in Computational Intelligence) can be great book to read. May be it can be best activity to you.

Carolyn Bailey:

People live in this new morning of lifestyle always attempt to and must have the free time or they will get large amount of stress from both daily life and work. So , once we ask do people have time, we will say absolutely yes. People is human not only a robot. Then we consult again, what kind of activity have you got when the spare time coming to you of course your answer can unlimited right. Then do you try this one, reading publications. It can be your alternative inside spending your spare time, typically the book you have read is usually Discrete-Time High Order Neural Control: Trained with Kalman Filtering (Studies in Computational Intelligence).

Laverne Dunbar:

As we know that book is important thing to add our knowledge for everything. By a guide we can know everything we wish. A book is a group of written, printed, illustrated or blank sheet. Every year seemed to be exactly added. This reserve Discrete-Time High Order Neural Control: Trained with Kalman Filtering (Studies in Computational Intelligence) was filled concerning science. Spend your free time to add your knowledge about your technology competence. Some people has several feel when they reading a new book.

If you know how big good thing about a book, you can experience enjoy to read a reserve. In the modern era like right now, many ways to get book that you simply wanted.
